Waller Throws Fuel on IOR-Recapture Fire

The *American Banker* today [reports](#) that FRB Gov. Christopher Waller answered a question by saying that the Fed does not need the \$2 trillion or so housed in the ONRRP to conduct monetary policy. Mr. Waller also said the Fed does not need the level it now holds of central-bank deposits from banks, noting that QT should continue with very significant reductions even though the precise amount of reserves needed to ensure market liquidity is unknown. We expect these statements to heighten GOP demands for recapturing the interest paid to banks and via the ONRRP for deficit-reduction purposes as detailed in a recent Petrou [memo](#) and our [issues forecast](#).
